

# FALL PREVENTION THROUGH OPEN-ABLE WINDOWS

**DOWELL**   
Our builders know best

## Using Dowell Windows to Meet Fall Prevention Through Open-able Window Requirements

Clauses 3.9.2.5 and D2.24 of the Building Code of Australia detail the situations in which open-able windows require fall prevention measures and the requirement that window in these instances must meet.

The following **Dowell Window products** and configurations **have passed testing** to the Australian Window Association's industry code of practice "ICP.005 – Protection of Open-able Window Testing Specification". These products **will not permit** a 125mm sphere to pass through it **and resist** a horizontal outward **force of 250N**.

### DOWELL SLIDING WINDOW
